

FROM FARM TO FORK

Our farm has always been our family's dream. We originally purchased the farm as a family retreat. The choice of this site was not made randomly. The area combines special environmental and climatic conditions that allow the cultivation of almost all kind of Greek nature's fruit and vegetables.

Within one year we realized that the farm was producing enough vegetables to cater for our guests at the hotel. The following year, the idea of opening the farm to the public became a reality. We wanted people to experience the privilege of eating organic fresh produce directly from a farm. With this in mind, we created the farm experience and started hosting bespoke events that remain true to our core values.
